Summary of activities to be included in the minutes of the Core Committee meeting:

Ignalina Youth Nuclear Association annually gathers delegates from different countries since 1988. Lithuanian Association decides that combination of scientific symposium and summer camp on the lake shore is effective mechanism to achieve some YGN goals.

Activities of national YGN organisation for the reporting period:

In the first decade of July the 21st annual Symposium within Dysnai Youth Nuclear Festival took place on the traditional Glade at the bank of Lithuanian lake. Living in the tents and plain food makes the event cheap enough. Accumulated experience since 1988 allows us provide delegates with carefully made installations - electrified stage and dining tents, sauna, hot shower, free bar. Comfortable buses took delegates to Conference Hall and excursion to Lithuanian capital. We believe that social-oriented games organized for participants during the Festival make them friends and more effective for future cooperation then only scientific discussions in formal conferences and restaurant parties. Some sport events, crystal water and fresh air add the picture. Organizers produce The Book of Reports and CD and distribute it among participants and concerned organizations and on our web site as well: <http://dysnai.org>

During accounting period Association organized a number of seminars with colleagues from Russia and Ukraine, worked with pupils of secondary schools.

General information about national YGN organisation:

Ignalina Youth Nuclear Association was established in 1988. Since 1999 it is a Youth Department of Lithuanian Nuclear Society (LBEA) and since 2001 Association recognized as a member of ENS YGN.

The main target of the Association's activities is to create conditions and an effective mechanism for communication, experience exchange, collective creation work and practice of the youth from different countries and nations in the area of nuclear energy, science, culture and ecology. One of mechanisms that contribute to achievement of this target is international symposium that is held annually at DYSNAI festival. By this time the Association has organized 21 similar annual events. Ignalina NPP, LBEA, and since 2005 ENS YGN support the Association activity. The Symposium is a forum for the discussion of the technical, scientific, regulatory and social aspects of the nuclear energy usage.

Plans for upcoming period:

International Youth Nuclear Festival and Symposium DYSNAI. Since 2002 delegates from Belgium, Bulgaria, Germany, Great Britain, Hungary, Romania, Russia, Slovakia, Sweden, Finland, Ukraine and Lithuania take part in Dysnai - approximately 150 participants annually. We believe that Lithuania is a good place for meeting the youth from West and East. During Symposium within Youth Nuclear Festival young people effectively use principals of Human Diplomacy, adopt Good Standards in common life and our profession, and develop new approaches to communicate benefits of nuclear power, promote further peaceful uses of nuclear science and technology for the welfare of mankind.

During symposium young people can adopt new trends in nuclear, generate ideas and during festival adopt Good Standards mentioned above. We think that our targets are the same as Congress', but very cheaper: no hotel accommodation, no restaurant food. But our worry is that there is no mechanism to fix up arriving delegates from West, invitations are still very individual. We solve this problem with Russia and Ukraine via Generating Companies.

We are planning to have some seminars with colleagues from Russia and Ukraine.

More plans are in preparation

Announcements of events of for the next period:

27 June - 04 July 22th International Youth Nuclear Festival and Symposium DYSNAI will take place. Our team work hard to make meeting effective and unforgettable.

Proposals for the future ENS YGN activities:

National YGN leaders have to make every effort to ensure participation of their representatives in Dysnai event. Lithuanians believe this experience will make YGN stronger.
