General information about national YGN organisation:

The YG network in Italy is supported and is a part of AIN (Associazione Italiana Nucleare - Italian Nuclear Association). The main purpose of the YG network in Italy is to establish a national network within the younger generation of professionals and students that are willing to make efforts to raise the interest in nuclear science and technology and learn from the experiences and knowledge of mature established professionals. For this reason the name: INN (Italian Nuclear Network) was chosen.

The idea is modeled on the concept created by the European Nuclear Society (ENS) where the aim is to establish links between people new to the field and more experienced individuals.

Some of the aims and objectives of INN in agreement with AIN, ENS and other network of the same kind in Europe and worldwide can be summarized as:

- organize a network as a base for information and discussion;
- improve communication between experts, members of the list, public;
- promote knowledge transfer between generations within the nuclear industry;

- encourage young people to stay within the nuclear field and provide a resource for the future;
- provide career opportunities and development;
- improve the development of nuclear technology.

(up to 1 page. may contain photographs, etc).

Plans for upcoming period:

Organize the national AIN meeting with larger YG participation. Identify activities to improve the involvement of YG in the mailing list, INN and AIN optimizing time and money resources. Complete and update the Web site.

Announcements of events of for the next period:

YG Participation at the ENS-YG Forum in Cordoba.

(national or international event that deserves to appear in the YGN calendars)

Ideas on the ENS YGN organisation:

These are some ideas:

1. have the presence of all representatives from every country ENS YGN meetings;
2. up-date the web-site regularly before or after each meeting and including agenda and brief news from every country;
3. diffuse news on YG meetings and Info of activities in every country.

Proposals for the future ENS YGN activities:

Organize meetings and events where YG members of every country are involved and can participate at the European level.

Proposals for the next ENS YGN Core meeting agenda:

Discussion on specific nuclear subject prepared by core-members.

Proposals on how to improve this form:
