

## Vision

ENS will be the recognised platform that brings nuclear societies and professionals in Europe together, allowing them to exchange knowledge and experience about nuclear science and technology. ENS will promote the development of nuclear science and technology and the understanding of peaceful nuclear applications.

## Strategic Objectives

### A. Supporting the member societies and their individual members

*Being the mother organisation of the national nuclear societies in Europe, ENS shall support information exchange and cooperation between its member societies and their individual members.*

1. Conference organisation
2. Enhanced society cooperation
3. Improvement forum

### B. Supporting professional development and networks

*By creating opportunities for professional development ENS is a facilitator for companies, research centres and academia within the European nuclear competence network.*

1. Conference organisation
2. Support YG and WiN networks
3. Maintaining nuclear competence network
4. Recognised partner of the European Commission
5. International partnerships

### C. Nuclear Advocacy

*As a group of nuclear societies ENS shall be the foremost grass-root advocate for peaceful nuclear applications in Europe. As a group of nuclear experts ENS is able to advice policy makers and key decision makers in nuclear related issues.*

1. Credible nuclear spokesperson
2. Academic recognition

### D. Nuclear communication and public awareness

*ENS is developing, promoting and sharing knowledge and understanding of peaceful applications of nuclear science and technology in Europe and shall be the first choice public information source on peaceful nuclear applications.*

1. Web portal on nuclear applications
2. Credible information provider
