### 9 am – 11 am Deep-dive insight session

#### Beating Cancer – turning the tide with medical isotopes

Every year 10 million patients in Europe benefit from nuclear medicine. In the past decade, research has made tremendous progress and medical isotopes are expected to become an even more vital tool in the treatment of many types of cancers.

In this session, we will learn about the use of medical isotopes for diagnosis and treatment. Our experts will give an update on increasingly effective therapeutics and the expected growth in medical nuclear procedures in line with these dynamic developments. We will identify what is needed to establish a robust supply chain in the EU and to ensure that all patients receive the care they need when they need it.

#### Speakers

Dr. WOUTER VOGEL, Antoni Van Leeuwenhoek Dutch Cancer Institute

Prof. MICHEL KOOLE, European Association of Nuclear Medicine (EANM)

RICHARD ZIMMERMANN, MEDraysintell, and SVEN VAN DEN BERGHE, Pantera

Charlotte ROSENBAUM, National Institute for Public Health and the Environment, The Netherlands

The session will be chaired by REMIGIUSZ BARANCZYK, European Supply Agency, and moderated by CORA BLANKENDAAL, NRG

*This session is public and will be streamed.*
